HARD SKILLS

- .Dart
- Flutter
- OOP
- SOLID
- Bloc
- Provider
- Getx
- Firebase
- Clean Code
- Localization
- Responsive
- APIs
- Animation
- Payment
- Github
- Git
- Notifications
- problem solving

SOFT SKILLS

- Time management
- Teamwork
- Critical thinking
- Conflict resolution
- Flexibility
- problem solving
- adaptability

Experience

Farkito

France , Remotely
02/2024 - 05/2024

During my full-time internship of over three months at Farkito **https://www.farkito.com** I developed and released two apps, Diyafa Customer and Diyafa Staff applications, using Flutter, I worked with both backend and Flutter developers. I also received a **Recommendation letter (clickable)** and **Completion certificate (clickable)**.

Reference

you can contact the CEO of Farkito, Kennou. He is available at contact@farkito.tn or +33 6 99 88 09 74.

Projects

Diyafa Staff   **https://play.google.com/store/apps/details?id=com.farkito.Diyafa_staff** | **Video**

The app served 10 different hotels with 6 different roles, managing orders received from customers, categorizing them, and scheduling times for the manager.
Created the UI and implemented API including DELETE, PUT, PATCH, and GET requests using Swagger..
Handled specific cleaning items and clothing services, categorized into cleaning, drying, and ironing.
Implemented functionality for changing the status of orders, including confirmed, refused, accepted, and pending.

Diyafa Customer   **https://play.google.com/store/apps/details?id=com.diyafa.customer** | **Video**

Developed the app to enable customers to make orders with specific chosen items.
Added functionality for scheduling delivery times additional to handling errors and edge cases.
Created a responsive app design to accommodate various devices and screen sizes.

SPARK Work Management System   **Github Link** | **Video**

Task Management: Implemented tasks with deadlines; only creators can delete or finish them, real-time collaborations through comments and notifications
Employee Directory: Designed an employee listing for quick access
Architecture: Implemented efficient data flow using BLoC and MVVM pattern
User Interface: Designed an intuitive interface spanning 13 screens, simplifying user navigation

Qata3   **Video**

An application that displays companies and products by searching or barcode scanning, and showcases products.
Contains over 35,000 products and 2,700 companies.
Highlights companies that we should not boycott, such as Egyptian products and others.

Face detection with AI   **Github Link** | **Video**

Connecting a Flutter app with TensorFlow Lite (tflite) and Teachable Machine to recognize faces and expressions.

Education

Computer Science and information Tanta University
